A GENTLE WAY TO END THE DAY

Fuwa Mint

Tell a fluffy cloud Bot how you feel, and get a glowing sticker.

At bedtime, it is hard to look back on your day. Fuwa Mint makes it soft and easy by turning it into a chat with a cloud.

- Made for a short look back at your day before sleep
- Your friend is a fluffy cloud Bot with a soft glow
- Calm pink and lavender sunset colors, not a game

02

How Fuwa Mint works

Write one small thing to the Bot, tap Fluffy Mint, and your feeling becomes a sticker with a letter.

- Type a feeling or tap a sample chip on the main screen
- A meter shows how rare your sticker may become
- Demo wallet and demo mint: a short progress screen, then a sticker
- Cloud Bot gives you a letter; stickers are kept in your book

03

Why it matters, and next

Feelings you share become something kind to keep. The rarity follows how much you open up, not how well you play.

- A warm habit: talk, receive a letter, sleep well
- Rarity changes with your feelings: soft, sparkle, rainbow
- Works in Japanese and English
- Next: a name polish and more ways to grow with your Bot
